Notebook Seharga PC

Harga notebook yang makin terjangkau tidak lagi menjadi barang mewah untuk sebagian orang.

Notebook sudah sangat populer dan tidak lagi menjadi produk mewah yang terjangkau oleh sebagian orang saja. Bahkan untuk merk-merk tertentu, harganya sudah mencapai harga PC, lengkap dengan segala macam fitur yang diperlukan untuk digunakan di mana saja. Yang menarik, perkembangan komputer notebook sekarang ini adalah meningkatnya kemampuan komputasi di dalamnya yang setara dengan kemampuan komputer desktop.

Selama ini mungkin, sebagian pembaca hanya mengenal notebook berbasiskan processor Intel. Pada edisi ini, Anda dapat melihat kemampuan dari notebook yang menggunakan processor AMD (Advance Micro Device) di "Hardware Test" kami, sebagai pertimbangan bagi Anda yang akan memilih notebook. Dengan harga yang murah, mulai dari harga US\$700 untuk AMD Sempron dan US\$1000 untuk AMD Turion. Untuk Sempron memiliki spesifikasi AMD Sempron 2800 MHz, harddisk 40 GB, DVD Combo, serta video card 128 MB.

Selain harga notebook yang mulai terjangkau, harga peripheral komputer desktop di pasaran pun semakin membaik dengan stabilnya harga dollar. Seperti harga video card yang malah cenderung turun karena makin banyaknya generasi

Meski daya beli masyarakat menurun, pasar komputer ternyata masih tetap bagus...

baru dari chipset ATi dan nVIDIA. Khusus harga motherboard relatif stabil tidak ada perubahan yang signifikan.

Meski daya beli masyarakat menurun, pasar komputer ternyata masih tetap bagus dan diprediksi akan cerah pada tahun-tahun mendatang. Pasalnya, komputer saat ini sudah menjadi kebutuhan masyarakat. Sebagai acuan Anda membeli peripheral komputer, berikut adalah daftar harga pheriperal komputer yang ada di pasaran. Daftar kami peroleh akhir Februari 2006, harga dapat berubah sewaktu-waktu.
